DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-2, 7-12, 14-27, 29-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Holman et al. 6,319,276. Holman et al. discloses the invention as claimed noting figures 1-12 comprising: a tubular member (10) and an outer covering (22, 24, 50), sealed to portions of the tubular member, a pocket being defined between the tubular member and an outer covering to accommodate a pre-determined agent, wherein the outer covering being impervious to said pre-determined agent. See col. 1, lines 41-65, col. 2, lines 3-24, co. 3, lines 1-3, col. 3, lines 44-47, col. 4, lines 18-26, col. 4 lines 30-34, can col. 4, lines 53-54.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holman et al. in view of 5,151,105 in view of Kwan-gett. Holman et al. has been disclosed above however Holman et al. does not specify the use of an expandable stent. Kwan-Gett teaches the use of a tubular sleeve graft in conjunction with a stent. See figure 7. It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize the stent with graft as in the Kwan-Gett patent with the graft of the Holman et al. Patent because it is well known in the art that expandable stents have been utilized for supports the graft structures.

6. Claims 28 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holman et al. in view of McDermott et al. 6,312,462. Holman has been disclosed above however Holman does not specify that the curing agent is urethane. McDermott et al. teaches expanding a bifurcated graft device with inflation fluids such as urethanes (see col. 4, line 32). It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize urethane because it also would cause the graft of Holman to expand and form the pocket.

Allowable Subject Matter

7. Claim 6 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Holman et al. 6,059,823 Chuter 5,725,547, and Turk 5,554,180 all show related material.
